Social Program

Bodyflying

Fulfill the old dream of mankind ... Fly!

A 5-blade propeller creates a vertical air stream up to 200 kilometers per hour, thus allowing people to fly. No experience needed. The instructors prepare you dutifully before your flight lesson. In base-laying instruction they will show you a short video, then you practice how to take a airworthy body position yourself, obtain information on entry and exit techniques and will learn the appropriate behavior in the wind tunnel. Finally, you will be clothed: flight suit, helmet and goggles will let you rise to the "First-Flyer"-status. Now you are ready to fly.

Your flight instructor will drive you threw the flight in the wind tunnel; he will guide you through all the maneuvers. Let yourself fall and enjoy your flight!
